

For Audiologists & Hearing Aid Providers

Please advise me if my hearing aid(s) have telecoils. If they do, activate and program them for use in a hearing loop. Also, please write instructions for their use on the back of this card. If I don't have a telecoil(s), can it be retrofitted or is there an accessory remote control/streamer telecoil option?

Program Recommendations

For open RIC fittings: manual T only program

For closed/occluded fittings: manual M +T program in social settings

For closed/occluded fittings: manual T only program for high noise environments like airports or train stations

Verify Mic and T-coil responses **match** in gain, output and frequency response in user programmed mode (use ANSI-SPLIV test procedure)

Programming questions?

Contact: Juliëtte Sterkens, AuD, jsterkens@hearingloss.org

I would like to use my telecoil(s) in a hearing loop or with a neckloop and an assistive listening device or system.

Please write clear instructions on how to use my manually accessible telecoil program.

For example: The numbered position of the program, number of beeps or voice prompt, and location of the switch to activate the telecoil.
