Hear & Beyond: Live Skillfully with Hearing Loss

by Shari Eberts and Gael Hannan

"Gael Hannan and Shari Eberts bring two lifetimes of experience to their new book [...] A valuable primer for those new to hearing loss, and a reminder to those with more experience of the many skills, tools and technologies available."

– Katherine Bouton, former *New York Times* editor and author of *Smart Hearing*

If you have hearing loss, you already know that the conventional approach to treatment is focused on hearing aid technology. Without a handbook to help you figure out how to actually live with it, you've likely been getting by on information pieced together from various sources – and yet, communication often seems incomplete and unsatisfying.

What's missing from this hearing care model is the big picture – a real-life illustration of how hearing loss, its emotions and its barriers affect every corner of your life. Now, hearing health advocates, consultants and speakers Shari Eberts and Gael Hannan offer a new skills-based approach to hearing loss that is centered not on hearing better, but on communicating better.
