Who are you leaving out?

48 million Americans, 13.9 million veterans can’t hear in your venue, place of business or office.

They can’t become your patrons, customers, or employees.

Hearing loops change that. They are ideal for...

Get in the Hearing Loop

Is a communication access program of the Hearing Loss Association of America. The Get in the Hearing Loop program is dedicated to providing community education, advocacy on behalf of people of hearing loss, and consultation services to help venues of all kinds improve hearing accessibility through hearing loop technology.

For additional information about hearing loops, the Get in the Hearing Loop program, or find out how to have a hearing loop installed...

Hearing loops are just plain good for business! They improve customer satisfaction, draw new patrons and their friends and family, boost employee morale and are good public relations.

With a hearing loop, a venue helps enrich lives, increases participation in activities and builds strong, engaged, inclusive communities.

Ideal for Everyone

Hearing loop systems serve everyone with hearing loss who would like to hear better. As with FM and infrared (IR) systems, hearing loops also offer accessibility to people who do not have hearing aids or hearing aids without a telecoil via portable receivers and headphones. People without hearing aids can also use earbuds.

Properly installed hearing loops are required to meet the International Electrotechnical Commission (IEC) standard 60118-4.

Creating hearing-friendly communities, one advocate, one ADA request at a time.
